
This is a title that has multiple lines

This subtitle is fairly short

A dissertation submitted in partial fulfillment
of the requirements for the degree of
Doctor of Philosophy

Department of Mathematical Sciences
Eponymous College of Arts and Sciences
University of Somewhere, October 2015

Author: Lowly Candidate
Degrees: B.A. Chemistry, 2000,
University of Somewhere
M.S. Physics, 2002,
University of Nowhere
M.S. Mathematics, 2007,
University of Nebraska

Chair: Random Advisor
Committee: Other Member
Another Member
Y.A. Member

Abstract

This is the abstract.

List of Tables

1.1. A table to supercede all other tables	1
--	---

List of Figures

A.1. Hi, I'm a floating figure! 7

Notation

\mathbb{N} the positive integers, also known as the *natural numbers* to mathematicians and computer scientists. 4

Introduction

“Chapter quotes can bring an air of sophistication to your work. Just be sure they aren’t signed ‘anonymous’.”

— Anonymous

1.1. Gentle beginnings

1.1.1. The art of introduction

This is where you give the first impression of your work. It is important that it comes across as interesting and worthy of study. Make sure you state the major problems you will solve later. Note that now the material is double-spaced instead of single-spaced (assuming you are using the `comply` class option). We will insert a short table so that one appears in the List of Tables.

x	y
This	That
These	Those
Here	There

Table 1.1.: A table to supercede all other tables

1.1.2. Harsh second dates

Unfortunately, not all is well-and-good in the land of make believe dissertations.

Chapter 2

Background

In this chapter we review the literature relevant to our work. Here you most likely should have some references [Tol57].

Chapter 3

Results

“God created the integers, all else is the work of man.”

— Leopold Kronecker

This is the chapter where we prove our main results. This will probably take more than one chapter. Suppose that God created the positive integers \mathbb{N} and nothing else, then we can conclude...

Glossary

dissertation the culmination of several years of work produced by a lowly Ph.D. candidate. 2

literature the body of published knowledge in a given field of study. 3

Bibliography

- [Tol57] J. R. R. Tolkien. “On referencing literature”. In: *Journal of British Nonsense* 63 (Feb. 1957), pp. 155–207.

Appendix A

Prerequisite material

We need a figure somewhere, so let's put it here.

I'm a float floating away. Float... float... float...

Figure A.1.: Hi, I'm a floating figure!
